

Bamboo screen

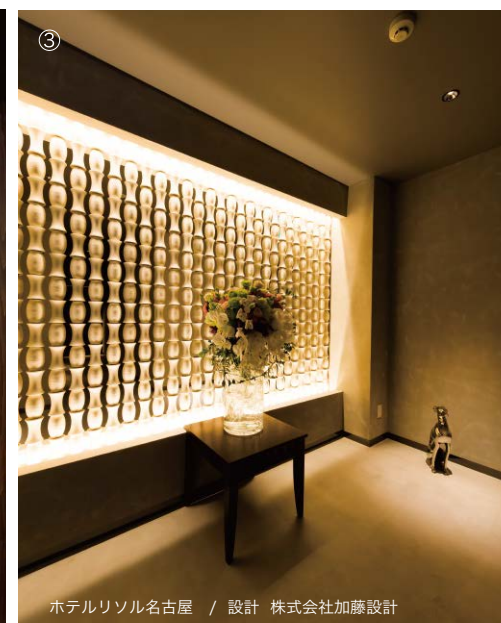

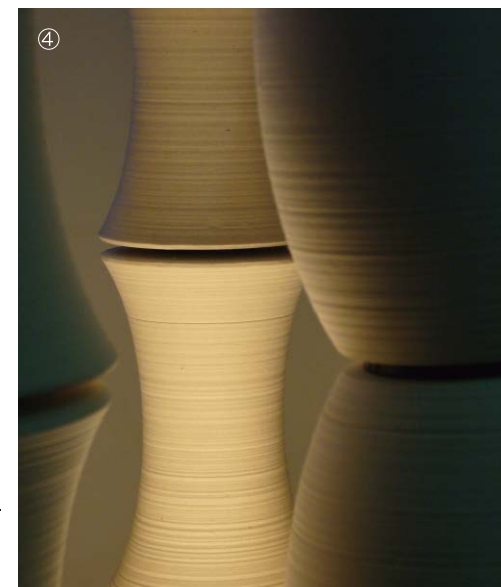

Remaking the bamboo design into two parts: swelling and hollowing.

Various expressions can be created depending upon the usage of the two shapes. The empty spaces as a design between the bamboos are also interesting.

size : $\Phi 75 \times 120$ mm

*The distance between poles can be designed on your discretion.
 *Winding screen wall is also created depending on how to set the poles.
 *Lighting tool can change the impression of the screen wall dramatically.
 *Metal fitting parts such as poles should be prepared at the project side.
 *The partition composed of this product has a characteristic of surface deflection.

Bamboo screen

NO.	color	pcs/m	size (LxWxT mm)	weight/pc
