- Ceramic product has individual differences, such as size and color shape. ■ Adjust size difference during installation. ■ Use elastic adhesives for tiles.
- Be careful for getting dirty when installation of unglazed white color because it is easy to get dirty.
- No.MS4-S There may be a glaze pot part at the center of hexagon due to its concave shape.
- Wide shade variation inherent in Metallic Silver Black and Antique Gold. Appearance may change depending on lighting type and direction.
- Metallic Silver Black is characterized by differences in expression and color range, and the impression varies depending upon how the light hits it. When used outside, the wrinkles in the glaze may fade or the color may darken over time.
- Antique Gold is for interior use only. The edges of Antique Gold may darken due to the nature of the glaze.
- Metallic Silver Black and Antique Gold : Avoid cleaning with acid materials, it will damage the glaze.
- This product is not sold by mesh-mounted units, sold by loose pieces.
